

Micro Technologies launches its Intelligent Surveillance System at its new Andheri Office

Micro Technologies has announced the launch of new and unique one pack solution of Premises Security product called the **Micro ISS (Intelligent Surveillance System)**. Micro ISS was launched at a ceremonial function at the newly opened Marketing Office of MSSL (Subsidiary of Micro Technologies) opposite SEEPZ, Andheri on 20th Mar. 08.

Being one of the first implementer, Micro ISS has been deployed at "Omnitech InfoSolutions Ltd." addressing the occasion Mr. Atul Himani, MD, Omnitech InfoSolutions Ltd. said that "Omnitech has set up the first Disaster Recovery Centre of India working on critical areas where security was the prime concern. Many security systems were evaluated catering to some part of the security features but Micro ISS was chosen to secure the entire premises on the basis of being the ideal multifaceted security solution. It not only addresses the security aspect of the entire infrastructure but also is far ahead in terms of early mitigation of disasters or anomalies. The second prime area of concern with security which Micro ISS caters is communication and timely intimation to the concerned authorities and that too in multiple modes. Micro ISS is integrated in such a way that the concerned officials instantly receive SMS alerts, E-mails according to the type of anomaly. With the help of various sensors installed critical areas are monitored for intrusion, fire, gas leakage, drastic changes in temperature, power failure. We are planning to install Micro ISS in all the offices across the nation which will be soon integrated with our central office and live monitoring and security issues can be taken care at ease."

Mr. Bharat Banka, President & Head Corporate Finance, Aditya Birla Group, who was also amongst the other dignitaries present on the occasion appreciated the initiative taken by Micro Technologies and stated that the society requires these types of products and Micro Technologies has taken a step far ahead in terms of its technology not only in the number of innovative products but also their outstanding marketing strategy ahead which will soon capture the security market in India and globally.

Micro ISS prove to be a boon for all type of premises whether large or small throughout the world which has large requirement for high quality and reliable security. Micro Technologies professionally designed IT based premises security systems Micro ISS come bundled with all the customized solutions as per the client requirement whether it is an access control or a Power failure or real time monitoring during the night or intrusion detection. Micro ISS would be one solution to all the requirements of security needs.

With several innovative features of live monitoring with CCTV camera, 24/12 recording at the server and authorized viewing at any point of time from anywhere in the world makes Micro ISS, the most advanced security solution one can look forward to. The external weather proof cameras captures clear recording with special night vision features record the videos even in the absence of light. This seamless and simple to operate solution reduces the manpower needs, increases the security capability with a reduction in the cost. The special secured zones have access control security system installed which gives RFID, Biometric and Login Based access for both entry and exit of authorized person triply ensuring the confidentiality and security of critical zones. Micro ISS will prove to be a boon for major premises such as Large and small Corporate, Office Building, Banks, BPO, Hospitals, Hotels, motels and resorts, Malls & Multiplexes, Commercial Building etc.
