MICRO TECHNOLOGIES

Micro LNTS (Lost Notebook Tracking System), launched to secure your Laptops

Micro Technologies launches a new software product - **Micro LNTS (Lost Notebook Tracking System)**. The product can locate stolen laptops leveraging the World Wide Web.

Looking to stem of the problem with leading notebook makers, Micro Technologies has designed new and innovative software for Laptops known as "Micro Lost Notebook Tracking System." Micro Lost Notebook Tracking System is embedded on notebook hard drives, allowing systems to be tracked as soon as they are connected to the Internet.

Micro LNTS is an ideal and proactive solution for Notebook Users. Users have to install Micro LNTS on their Laptops where it resides and operates in stealth mode to be able to locate laptops in the event of a theft. They may login to their web-based personal tracking and monitoring page through www.microlnts.net to view and trace where their laptop has been accessed from that too from any corner of the world. Other range of premium features Micro LNTS is far more efficient and competitive to existing low end products available in the market include Regular Emails for computer/notebook Activity, Hide the documents that carry vital information, Date wise storage of data, Misuse of any computer / notebook can be blocked at any point of time remotely by Control setting, Login intimation on mobile & email. Remotely monitoring of user specified URL/Document, List of installed software etc. Especially the **Micro LNTS – Corporate model** keeps track of the whereabouts of each employee while travelling and the moment user logs in via the web, a report is generated with the complete details and is sent to a designated individual within the organization.

Priced much cost effectively Micro LNTS is available in three different models **Micro LNTS- Elite and Premium for individual users and Micro LNTS-Corporate** for large organizations and corporate use. The product can be bought online at www.microlnts.net.

Micro LNTS can prove extremely effective in reducing theft. The large customer base consists of consumer right from individual users to large corporate working on critical information.
