MESSAGE

**Dated: 20<sup>th</sup> November, 2001**

It is a pleasure to know that Micro Technologies (India) Ltd. is coming out with a product called Micro Internet Access Security System ( Micro IASS). With the widespread use of Internet for a variety of applications, this security feature shall have a profound impact on strategic sectors like Defence, Space Applications, Atomic Energy and some personal services.

Your initiative of setting up an ultra Modern Hi-Tech Infotech Park to be known as MICRO INFOTECH PARK at Vashi will certainly encourage IT investment in Maharashtra and promote the State as an 'IT Investment Destination'.

I congratulate the Mirco Technologies Ltd. team for their efforts and wish them all success in their endeavour.

प्रमोद महाजन
