

Micro Technologies Vehicle Security product gets approval for FORD Vehicles

Micro Technologies India Ltd has informed BSE that Classic Series has been approved for installation in Ford Ikon Vehicles. FORD has permitted the Company to appoint the existing FORD dealers as the Company's Authorized Sales Outlets for all Ford vehicle owners.

The Company will provide training to FORD DEALERSHIPS at its training centers and at the dealerships, depending on the requirements. Service support will be offered through these trained FORD dealers and Service centers of the Company in various locations.

Micro VBB is a messaging, anti-theft security system with Life support features with various sensors installed in the vehicle. This intelligent box has, emergency alert switch, Telematics, intrusion detection of vehicle doors and immediately intimates these events to vehicle owners mobile, telephone. Apart from intrusion intimation to registered user, VBB could remotely give commands and activate mechanical action in the vehicle, simultaneously get confirmation back on the action taken by the system.

The Company expects this relation to consolidate its position as the market leader in this field and have the first mover advantage globally.
